Answer Key

Question Number	Question	Answer
1	Which model is represented as a weighted summation of component Gaussian functions?	Gaussian mixture model
2	Which of the following parameter impacts bandwidth estimation?	Quantile
3	Can you select the correct parameters that are needed to be passed while computing clustering with MeanShift?	Bandwidth and bin_seeding
4	Which of the following is a method of interpretation and validation of consistency within clusters of data?	Silhouette
